Open to Remote • Hybrid • On-site • Employer-Sponsored Work Visa

Professional Summary

Software Engineering graduate with hands-on experience designing and building modern web applications using React, TypeScript, FastAPI, Python, Docker, and REST APIs. Experienced in developing responsive user interfaces, integrating AI-powered services, and collaborating on full-stack applications that combine computer vision with Large Language Models. Passionate about creating intuitive, accessible user experiences and seeking a Front-End Developer role while eager to grow into Full-Stack development.

Technical Skills

Front-End: React, TypeScript, JavaScript (ES6+), HTML5, CSS3, Responsive Web Design

Back-End: Python, PHP, REST APIs, SQL, MySQL

AI & ML: TensorFlow, scikit-learn, GridSearchCV, LLM Integration

Tools: Git, GitHub, Docker, Docker Compose, VS Code, Jupyter Notebook, Figma, GitHub Pages

Languages: English (Professional Working Proficiency), Turkish (Native), Persian/Farsi (Native)

Professional Projects

Leafy – AI-Powered Plant Disease Diagnosis Platform

- Collaborated with a 4-person team to build a plant disease diagnosis platform combining image classification with an LLM-powered chat assistant. Built a responsive React and TypeScript frontend for diagnosis and conversational interaction.
- Integrated the OpenRouter LLM API to power the conversational chat feature.
- Designed and built the chat interface on the frontend.

ESG Score Prediction Using Machine Learning (Master's Thesis)

- Evaluated five regression algorithms using data from 101 companies and 539 features.
- Performed GridSearchCV hyperparameter tuning and 5-fold cross-validation.
- Random Forest achieved the strongest overall performance (MAE 7.89, MSE 100.91).

Personal Portfolio Website

- Designed and developed a responsive portfolio website showcasing projects and technical skills.

Professional Experience

IT Support Intern – Noor Credit Institute

- Installed and configured hardware and software.
- Resolved end-user technical issues.
- Supported daily IT operations.

Education

MSc, Computer Software Engineering

Istanbul Aydın University (2022–2025)

Relevant Coursework: Machine Learning, Data Science, Data Mining, Software Engineering, Advanced Algorithm Analysis, Object-Oriented Programming, Data & Network Security.

Master's Thesis: AI-Based ESG Score Prediction Using Machine Learning.

BSc, Computer Software Engineering

Azad University – Gorgan Branch (2017–2021)

Academic Project: Developed an e-commerce application using PHP, MySQL, HTML, and CSS.

Core Competencies

Front-End Development • Responsive Web Design • REST API Integration • Object-Oriented Programming
• Agile Development • Problem Solving • Team Collaboration

Employment Preferences

Seeking Front-End Software Engineer, React Developer, Junior Software Engineer, or Junior Full-Stack Developer roles. Open to Remote, Hybrid, On-site, Relocation, and Employer-Sponsored Work Visa opportunities.
