SUMMARY

Software engineering graduate with hands-on experience building modern web applications using React, TypeScript, FastAPI, and Docker. Developed AI-powered and machine learning projects while gaining practical experience in frontend development, responsive UI design, and REST API integration. Passionate about building intuitive user experiences and eager to begin my career as a Junior Frontend or Full-Stack Software Engineer.

PROJECTS

Leafy — Multimodal Plant Disease Chatbot

[Link](#)

Python · FastAPI · TensorFlow · LangChain · React · TypeScript · Docker

- Built a full-stack app that classifies plant leaf diseases from an uploaded photo using a trained CNN, then explains the diagnosis and answers follow-up questions through an LLM-powered chatbot with conversation memory.
- Designed the API with FastAPI and the chat UI with React, TypeScript, and shadcn/ui; containerized both services with Docker Compose.

ESG Score Prediction Using Machine Learning (MSc Thesis)

[Link](#)

Python · scikit-learn · pandas · Jupyter Notebook

- Built and compared multiple machine learning models to predict company ESG (Environmental, Social, Governance) scores, using data from 101 companies across 539 financial and sustainability features.

Personal Portfolio Website

[Link](#)

HTML · CSS · JavaScript · Git/GitHub

- Designed and built a dark-themed portfolio site from scratch (hero, about, skills, projects, contact) and deployed it live via GitHub Pages.

EDUCATION

MSc in Computer Software Engineering

09/2022-12/2025

Istanbul Aydın University

- Thesis focused on developing an AI-based ESG scoring model using machine learning and NLP
- Built foundational skills in Python and applied ML through hands-on projects

BSc in Computer Software Engineering

09/2017-09/2021

Azad University – Gorgan Branch

- Developed an e-commerce website using PHP and PhpMyAdmin; coursework covered front-end/back-end fundamentals and database design.

EXPERIENCE

IT Support Intern Noor Credit Institute

04/2021-07/2021

- Assisted with computer and software installations and resolved basic technical issues for end users.
- Supported the team in day-to-day IT operations, gaining hands-on exposure to software and systems fundamentals.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, React, TypeScript, Tailwind CSS

Backend: Python, FastAPI, PHP, SQL/MySQL

AI / Machine Learning: scikit-learn, NLP fundamentals

Tools: Git, GitHub, Docker, VS Code

Languages: English (B2), Turkish & Persian (Native)
